TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL

Frontend: React.js, Next.js 14 (App Router), Tailwind CSS, Framer Motion

Backend: FastAPI, Node.js, REST APIs, WebSockets, JWT Authentication

Databases: PostgreSQL, Supabase, SQLite

AI/ML & Computer Vision: MediaPipe, OpenCV, Scikit-learn, EAR/PERCLOS-based Fatigue Modeling

Developer Tools: Git, GitHub, Docker, Vercel, CI/CD (GitHub Auto-Deploy)

PROJECTS

HireReady | AI Resume Analyzer and Interviewer

[Live Demo](#) • [GitHub](#)

- Developed an AI mock interview platform using Next.js 14, TypeScript, and Zustand with voice interviews, real-time face analysis, speech-to-text, and weighted feedback scoring across 6 categories.
- Engineered a multi-provider AI failover router (Gemini, Groq, Mistral, OpenRouter) with retry logic and a full heuristic fallback layer for zero-API-key operation.
- Implemented an ATS resume analyzer with PDF/DOCX parsing, AI scoring, and weak-bullet rewriting; secured with JWT auth and Supabase sessions, deployed on Vercel with GitHub-integrated CI/CD.

GuardianEye | Driver Drowsiness Detection System

[Live Demo](#) • [GitHub](#)

- Architected a real-time drowsiness detection app using Next.js, FastAPI, and MediaPipe FaceLandmarker; tracks eye closure, yawns, head pose, and gaze entirely in-browser — no video leaves the device.
- Implemented JWT auth, WebSocket telemetry, dual scikit-learn models, 4-tier alert escalation, an LLM driving coach, a fleet dashboard, and CSV/PDF export.
- Deployed the frontend on Vercel and the FastAPI backend on Render with Supabase PostgreSQL, using GitHub-integrated auto-deployment on every push.

Online Voting System

[GitHub](#)

- Created a full-stack voting portal (Streamlit + PostgreSQL) with role-based access, admin-managed elections (2–10 candidates), live turnout tracking, and result charts.
- Enforced one-vote-per-student with a DB-level UNIQUE constraint and IntegrityError rollback (race-safe), decoupled voter identity from vote choice for ballot secrecy, and hid live counts to prevent turnout bias.
- Deployed on Streamlit Community Cloud with GitHub-integrated CI/CD, a Supabase/Neon-ready Postgres connection, and bcrypt-hashed auth across a 6-table schema.

EDUCATION

Gurukul Kangri Vishwavidyalaya, Haridwar, Uttarakhand, India

Aug 2023 – May 2027

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.50/10.0

EXPERIENCE

Applied AI Intern | AICTE & IBM SkillsBuild (via CSRBOX)

Dec 2025 – Jan 2026

- Designed and built practical AI-based solutions during a 6-week Applied AI Internship, progressing from core AI/ML concepts to hands-on implementation.

Front-end Web Development Intern | IBM SkillsBuild (via CSRBOX)

Jun 2024 – Aug 2024

- Built and deployed a multi-page responsive website on ocean conservation (UN SDG 14), covering marine ecosystems, pollution, and sustainability content.

[Live Demo](#)

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Cloud Computing — NPTEL (IIT Kharagpur), Elite, 80% (Jul–Oct 2024)

ACHIEVEMENTS

- Solved 185+ Data Structures & Algorithms problems on LeetCode
